

AI VS ML VS DL VS DS

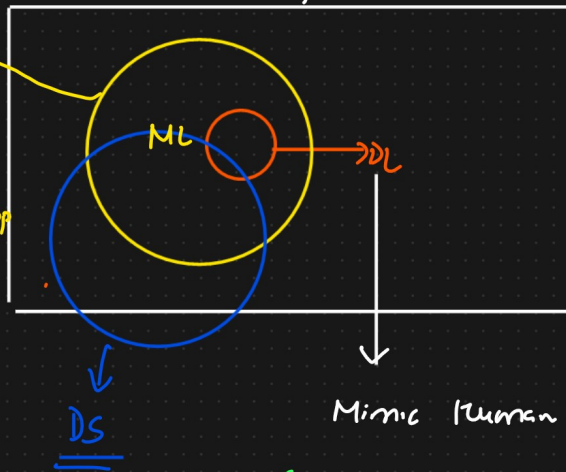

AI → Smart Applications that can perform its own task without any human intervention

Eg: Self Driving Car
Robots

Maths

- ① Linear Algebra
- ② Statistics
- ③ Probability
- ④ Calculus

It provides Statstool
to learn, analyze,
visualize and develop
predictive models from
the data

Mimic Human Brain

{Multi Layered Neural N/w}

Eg: Object Detection

Image Recognition

Chatbot

ChatGPT

Recommendation

Eg: Amazon

Netflix → Recommendation System

Classification Application

Regression Application
